DUE TO COVID-19 WEARING MASK OR FACE COVERING IS MANDATORY

EAST SEVIER COUNTY UTILITY DISTRICT BOARD OF COMMISSIONERS MEETING

October 15, 2020 5:30 P.M.

AGENDA

- 1) Call to Order by President Roy Ivey
- 2) Introductions of Commissioners, Alliance Personnel and ESCUD Manager
- 3) Motion to approve the minutes of the previous Board meeting
- 4) Persons to be Heard (you must reserve time 2 days prior to meeting date)
 - **ONE AT A TIME AS RECOGNIZED**
 - When it is your turn to speak, please stand state your name, address and phone number prior to your discussion. Time limit is 10 minutes.
 - Please be considerate of others that may wish to speak by keeping your comments brief.
 - Customers that interrupt others speaking may be asked to leave meeting.

REPORTS

- 5) Motion to approve the Accounts Payable Listing in total as submitted.
- 6) Alliance Water Resources Financial Report / Operations

OLD BUSINESS

7)

NEW BUSINESS

8) Project Update

- 5:30 pm

- 9) Memorandums Purchase of Leak Detector unit
- 10) Adjournment Next regular Board Meeting to be held on Thursday November 12, 2020
- **Anyone without the authority or knowledge of ESCUD and/or water systems should refrain from giving instructions to other customers**

Timeline of Events Well C Pump Replacement / Recovery Efforts

- 8/24/2020 Repaired 3" water line on Wexford Way.
- 8/26/2020 Noticed slight decrease in Well C daily water production.
- 8/28/2020 Well C storage tank level at a lower than normal operating range. All ESCUD staff searching for line leaks and/or breaks.
- 8/28/2020 Notified Mission SCADA of erratic signals from Well C station. Mission SCADA stated that they thought the telemetry antenna and cable were faulty and suggested replacement. Replacement parts were approved and were awaiting delivery.
- 8/30/2020 Overnight storm caused power glitch, Well C pump tripped off. Pump was reset but remained off for several hours.
- 8/31/2020 Well C pump only pumping approximately 25 gpm. Normal pumping rate is 35 gpm.
- 8/31/2020 SUEZ Corporation is under contract to provide annual and emergency service for Well C. Contacted SUEZ Corp. for Well C contract assistance. Message was left with phone operator. Was told by phone operator that the Tennessee Service Manager would be in contact.
- 9/1/2020 Contacted SUEZ Corp. for status on emergency service request, was told again that the Tennessee Service Manager would be in contact. Made three calls this day.
- 9/2/2020 Called SUEZ Corp. for update on emergency service. Around lunchtime Service Manager "Ron" called stating he was trying to locate a local well company to help us.
- 9/3/2020 Made several calls to "Ron" and SUEZ inquiring about the status of a well company.
- 9/4/2020 SUEZ Representative called saying a technician with Corum Pump Service and Well Drilling was coming to look at Well C. Rep from Corum arrived late afternoon looked at the pressure gauge and stated that the pump was pumping 35 gpm and left. At that time a flow test was done by ESCUD staff and the well pump was only pumping 20 gpm.
- 9/5/2020 & 9/6/2020 Well C pump being operated in 'HAND" mode.
- 9/7/2020 Contacted SUEZ Corp, told them what the Corum rep. had stated and the actual flow rate of the well pump. They stated that they would have Corum come back out.
- 9/8/2020 Two reps from Corum arrived late in the afternoon to re-evaluate Well C pump. They determined that the pump was bad and needed replaced. At that time pump was pumping 14-16 gpm.
- 9/9/2020 Several calls were made to SUEZ Corp. by ESCUD Manager and Evan Romo.
 Contact was made with SUEZ Corp. CEO and President.

- 9/10/2020 Scott Byfield, Project Manager, for SUEZ on site along with B&R Well Drilling and Pump. B&R re-evaluated pump and concurred that it was in need of replacement. A new pump and piping was ordered and scheduled to be installed on Friday 9/11/2020. The old pump was removed this date.
- 9/11/2020 The new well pump and piping was installed. Installation was completed at 2:30 am. The new sustained flow rate with the new pump is 38 gpm.
- 9/13/2020 Well C storage tank level not increasing as it should. All available ESCUD staff are out looking for leaks and/or breaks.
- 9/15/2020 Repaired 2" water line break on Alpine Dr. and Swann Saddle.
- 9/16/2020 Well C storage tank level not increasing as it should. All available ESCUD staff are out looking for leaks and/or breaks.
- 9/17/2020 Wells A&B booster pumps were found to have bad seals. No water was being pumped from A&B station. Staff was able to get one pump back in service. Necessary repair parts were ordered with priority shipping.
- 9/18/2020 Crew from Martin County Kentucky enroute to English Mountain with acoustic leak detection equipment to assist ESCUD personnel.
- 9/19/2020 Repaired 2" water line break on Wexford Way and Clingman's View.
- 9/22/2020 Found Wells A&B booster pumps operating erratically. Very off and on cycling. ESCUD and Big Orange Electric personnel switched operating mechanics from transducer operations to float ball operation. Pumps are cycling properly and tank is maintaining a higher operating level. . All available ESCUD staff are out looking for leaks and/or breaks.
- 9/23/2020 Repaired 2" water line break on Laurel Oak and Alpine Dr.
- 9/24/2020 Well C storage tank level not increasing as it should. All available ESCUD staff are out looking for leaks and/or breaks. Wet weather is hampering leak finding efforts.
 Requested assistance from Martin County Leak crew again.
- 9/24/2020 Ordered new pumps, motors, variable frequency drives and electrical switches to install a redundant booster pump at Well C.
- 9/25/2020 ESCUD and Martin County Personnel worked on locating water line break, negative results this day.
- 9/25/2020 An emergency memo was drafted to the Board for the purchase of a leak detection unit for ESCUD. Both Roy and Jan verbally approved this purchase request.
- 9/26/2020 Found and repaired 8" water line on Alpine Drive. The 8" water line had a 12" split in the pipe and the water coming out of this break was flowing directly into the creek on the side of Alpine Drive.
- 9/28/2020 A Fisher XLT-17 Liquid Leak Detection unit was ordered.

MINUTES

BOARD OF COMMISSIONERS OF THE EAST SEVIER COUNTY UTILITY DISTRICT

Thursday, September 10, 2020

The Board of Commissioners of the East Sevier County Utility District met at 5:30 p.m. on Thursday, September 10, 2020, in the Office of the East Sevier County Utility District, 1529 Alpine Drive, Sevierville, TN 37876. Commissioners present were Roy Ivey, President; Barbara Darby, Secretary/Treasurer; and Janice Brooks-Headrick.

President Roy Ivey called the meeting to order at 5:36 p.m. for any old or new business.

A motion to approve the minutes of the August 13, 2020, meeting was made by Barbara; Janice seconded the motion. Motion carried.

A motion to approve the Accounts Payable listing in total as submitted was made by Janice; Barbara seconded the motion. Motion carried.

Evan, Division Manager, suggested that the order of the agenda be changed to accommodate the many people in attendance who wished to speak. This would allow them the option of leaving the meeting earlier. Janice motioned to move Item Number 5 under the "Persons to be Heard" heading to Number 4 on the agenda, which would make Item Number 4 under the "Reports" heading the fifth place item. Barbara seconded the motion; motion carried.

Persons to be Heard

Ed Crosby of 1001 Old Laurel Lane said he has both a water filtration system and a water softener system in his home. He brought a sample of the debris he takes out of the screen in his faucet; the debris were tiny different colored grains that he asked the Board to identify. Evan and others in the audience also examined the sample. The consensus was that the sample contained iron and calcium. Ed has to change his filters often, which is getting expensive. He would like someone to address this problem. He said all the pipes in the house are Pex, so the debris isn't coming from his indoor plumbing. He also said he gets more sediment from the hot water lines than the cold; Roy said that is normal. Roy also mentioned that Eddie's house is at the end of the line, which doesn't help the situation. Jan asked Eddie which well he is on; he said Well C. Evan said Ed is one of the few customers whose water is coming from Wells A & B as well as Well C.

Evan explained that we are in the process of determining if a filtration system can be installed on Wells A & B. He said we first must size the wells to determine what they can produce versus what the filtration system can handle. We would have to have it

fracked beforehand. Even with the filter in place, Evan explained, the water will still have some sediment in it. In order to completely remove all the unwanted particles from the water, we would have to build a water plant, which would run into the millions of dollars. We have to spend smart. Before we would do anything else, however, we have to get Well C up and running.

ESCUD has been unable to provide water to the gatehouse at The Preserve because of a leak that cannot be found. ESCUD has provided hundreds of thousands of gallons to the property, but somewhere along the line, the water gets diverted, possibly because of a leak. ESCUD staff has spent hours looking for a leak without finding it. If a leak does exist, and it likely does, it is not coming up out of the ground, but rather is probably running into an underground cavern.

David Fielder, attorney for Dan Barnett, developer of The Preserve, said that Appalachian Resort has no water and has been out of water for some time. He has handled similar cases in his career but has never seen a situation this bad. His client has a lot of money invested in this project. Scott Bell, the owner of the only house in The Preserve, also has had major problems with water availability. He warned that ESCUD is running the risk of being sued; he also threatened to call TDEC to complain. He stated that ESCUD must find a solution to this problem, no excuses.

He asked what happened to the leak detection company we that was supposed to come out to find the leak a couple of weeks ago. Evan said that they are scheduled to arrive on Monday, September 21, at the rate of \$2,000 per day. However, we must wait until the pump is installed at Well C, which is currently off line. The Well C tank has been steadily losing water for the last two weeks due to the pump going bad. We cannot find a leak until we can fill the pipes with water. Evan apologized for taking so long and assured everyone that we are taking the problem seriously. Dan asked if Scott would have water next week; Evan replied that he would if we can turn the boosters on. We can't burn up the boosters.

Ed asked how long Scott has been without water. Scott said the problem has been going on for years. Evan commented that there are only 247 customers to support this Mountain. Scott requested that ESCUD make him whole so the bank doesn't repossess his rental house.

Marsha Wingate of 1136 Eagle Point asked why we are taking on new customers when we cannot provide water to the current 247 customers. Roy said we could provide the Preserve with their own well; however, it would have to be placed at the top of the mountain where many of the houses will be built. The incline is too steep to pump the water upward. Dan said he is open to that solution. At first he was promised water and sewer. Then he was told that there would be no sewer service so he spent the money to put in a WWTP. Now he is unable to get water service. Roy said he told them years ago that there would be problems with providing water there. Scott asked who Roy is referring to. Roy replied that he warned the original developer that there would be issues, but no one would listen to him.

Scott suggested that the District allow him to stop paying his bill until he is made whole for the loss of rental income due to there being no water available at his rental house. Scott commented that he is not rich; he got stuck with this big house that he is struggling to keep. Evan and the Commissioners told him that he needs to bring proof of his losses. Scott said that he usually rents for \$335 per day, seventy percent of which he gets to keep. The rest goes to the management company. He rents the house for more money during Holidays. Scott said that in his 68 years, he has never experienced problems of this magnitude with one of his utilities. Evan told him to bring in the documentation, and he will see what he can do for him. Scott then left the meeting.

Marsha spoke up about what Scott had talked about. She said if you compensate him you will have to compensate everyone who has rentals on the Mountain. This could lead to customers asking for credits for being out of water when there are leaks. Jan said that we are aware of that.

Tommy Turner of WNC Hydrofracking spoke about what would be involved in fracking Wells A & B. He had been at the April 2019 meeting when Roy had contacted him to address the topic. Evan asked if Tommy would place a camera into the well first to get an idea of the conditions down there. Tommy said that he does use a camera. He then asked if there are pumps in all the wells; Evan replied that there are. Terry Wingate asked how fracking works. Tommy explained that he uses strong water pressure to knock out any rocks and loose sediment that can hamper the well production. This would be a preliminary step in determining if the filters should be installed at the wells. Evan asked Tommy about the cost, and Tommy responded that he charges by the hour. He did not say how much. Janice motioned to move forward with fracking Wells A & B; Barbara seconded the motion. Motion carried.

Evan stated that before we have the fracking done, we must pay for the leak detection at The Preserve. We are sending thousands of gallons over there that is being lost at some point. This drains water out of Well C, which we can't afford to keep doing. Ed asked how long it takes to fill the Well C tank. The reply was 3-4 days. After all visitors from The Preserve had left the meeting, John Haak, local manager reported that he had received a threatening letter from Attorney Fielder only three days after they had mowed the grounds as they had agreed to last meeting.

Reports

Evan Romo, Division Manager, went over key points of the financial report with the Commissioners. Barbara motioned to approve the financial report as presented; Janice seconded the motion. Motion carried.

Evan also discussed operations for the month of August. On the Mountain a water tap and meter was installed at 1510 Sourwood Honey Drive, and both water and sewer was provided to 1500 Black Oak Drive. The pump at the English Mountain WWTP lift station was replaced and a 3" line leak was repaired at Wexford Way. Also, after investigating an odor complaint from a resident of the English Mountain Condos, staff found a break in the service lateral coming from the English Mountain Recovery Center.

They were advised of the situation and opted to contract Roy Ivey Excavation to make the necessary repair. The August safety meeting topic was lockout/tagout. We took possession of our two new Ford Ranger trucks, which was a real positive for the month.

Offsite, we installed effluent flow meters at Sherwood Forest and responded to several service calls at Smoky Mountain Ridge, Sherwood Forest, and Douglas Lake.

The Well C tank level remains at a critically low level. Leak detection in the field yielded negative results. We have been running the well pump in hand mode in order to meet the daily demand for water. The well pumping rate is significantly lower than normal. The regular rate is 34 gpm; the current rate is only 24 gpm. Suez, our contracted service company, had been notified as soon as the tank levels began dropping. However, it took several days for them to actually do something. The pump is being pulled now, and a new pump that was on hand in the ESCUD office is to be installed.

Old Business

None

New Business

Evan reported that the WWTP construction is just around the corner. We heard from the USDA this week; they have given ESCUD their approval for the financial aspect of the project. However, TDEC has not responded yet. Once we get their approval, we can begin taking bids. Barbara asked about the contract with Doug Hodge. Evan said that it won't be long before everything is in place and the contract with all the stipulations can be signed for the For by Grace Resort we will be operating. He also asked John to remember to ask Darrell about the similar agreement we have with a small subdivision in Dandridge.

The next regular meeting will be held on Thursday, October 15th, 2020, at 5:30 p.m. instead of the 8th. Evan asked if we could move the meeting back so that he could be present. Everyone agreed to do so.

Adjournment

Roy motioned, and Barbara seconded the motion, to adjourn at 7:00 p.m. Motion carried.

OPERATIONS REPORT – East Sevier County Utility District

September - 2020

<u>Administrative</u>

Nothing to Report

Treatment

Treatment at the wells is monitored daily. Water treatment has improved since the installation of the filters at well C.

Treatment at the wastewater plant is effective. All monthly parameters were within permit limits.

Collection/Distribution

Will Serve Letters were issued for Hibernation Station Lot 21, Lot 31, Lot 38, Lot 54, Timberlake Bay Lot 26, Bear Creek Crossing Lot 103, Lot 115

New well pump and piping was installed at Well C. new sustained flow rate 38 gpm.

Working with Mission SCADA and Kazmier Group to resolve telemetry and communication issues with Wells A/B and Well C.

Customer Service

Several after hours and weekend call outs for the offsite wastewater facilities throughout entire month.

Project Updates

OPERATIONS REPORT – East Sevier County Utility District

Safety

ESCUD employee was injured while weedeating.

Regulatory

Monthly Water and Wastewater reports were successfully submitted to the Tennessee Department of Environment and Conservation.

Training

Concerns for the Month

Communications with our SCADA system are very inconsistent and/or null due to Verizon Wireless cell tower issues. Held several conference calls with Mission SCADA, Verizon and Local Manager. A Priority 1 repair ticket was initiated with Verizon, timeframe of completion is unknown. Operating Well pumps and boosters in a "HAND" mode in order to supply distribution system with adequate water.

Positives for the Month

James Ford and Josh from Martin County were able to assist and train ESCUD personnel with their leak detection equipment and found some major leaks in the distribution system.

ESCUD Board of Commissioners approved the purchase of a leak detection unit. Unit was received and placed into use.

Leak Repairs

Repaired 2" line break on Swann Saddle and Alpine Drive.

Repaired 2" line break on Wexford Way.

Repaired 2" line break on Laurel Court and Alpine Drive.

Repaired 8" line break on Alpine Drive.

East Sevier County Utility District 1529 Alpine Drive Sevierville, TN 37876

Memorandum

Discussion/Action

To: East Sevier County Utility District Board of Directors

From: Staff

Date: September 23, 2020

Re: Purchase of Leak Detector

With the past and future growth of ESCUD, it is becoming necessary for the field personnel to be able to locate leaking and/or broken underground water lines and sewer lines. To do this in a precise timely manner the use of a water line leak detector is necessary. A leak detector will also be a valuable tool to promote faster leak repairs. This is especially important when we are experiencing wet weather and when leaks do not come to the surface right away.

We would like to request to purchase one Fisher XLT-17 Leak Detector. The cost of this locator is \$1615.00.
